# **FinLink**<sup>®</sup>

## **FinLink**<sup>®</sup> **Product Specifications**

#### Colors\*

\* Exact representation of slat colors in printing is difficult. Please refer to actual color samples for final matching. Covered by one or more of the following patents: US Patent 5,806,839

### The FinLink<sup>®</sup> slat offers an increased degree of coverage with a unique configuration of (3) three privacy fins.

FinLink provides a quality looking installation and is used together with a patented bottom channel. This process ensures that all slats are even in the wire and will not slip to the ground.

#### Design

Our unique patented design includes a rigid, flat tubular body, with "legs" inside for extra support. Three flexible fins (two on one side and one on the other) are positioned on the side of the slat body. The FinLink fins are not serrated, thus providing a smooth finished look.

4, 5, 6, 7 and 8 feet.

Slat Length

PDS

31/2" shorter than overall height of fence.

Wind Load and Privacy Factor Approximately 90%.
